

MOTUS TRAVEL COSTS

THE DATA YOU NEED TO ESTIMATE, PLAN
AND APPROVE ANY BUSINESS TRIP.

As organizations adapt to an increasingly modern workplace, employees are traveling more for work. With this change, travel expenses are a top line item in many budgets. What's more, travel costs are rising, making them even more challenging to manage. Many businesses need to control their T&E budgets but don't have the tools to accurately estimate and control spend.

CHALLENGES, SOLVED.

Accurate insights into travel costs are necessary for creating effective travel policies, booking travel within the policy parameters and getting estimates for pre-trip approvals.

Finance leaders forecasting travel spend and setting per diems without knowing real costs face considerable challenges. Similarly, managers and employees, without accurate insights, lack the context needed to understand reasonable costs within a city. The same applies for travel buyers who need reference points to negotiate favorable corporate travel rates.

Motus Travel Costs offers the tools necessary to optimize T&E spend, create location-specific trip estimates and provide travel cost benchmarks. The Travel Costs product suite includes a Business Trip Cost Estimator, City Benchmarks and Airfare Benchmarks.

Companies in the U.S. will spend \$111.7B to send employees on over 117M business trips in 2019.

Expected Business Travel Cost Increases in 2020:

Airfare	↑ .5 - 1%
Ground Transportation	↑ 2%
Hotel	↑ 2 - 3%
